PROFILE SUMMARY

Aspiring Java Full Stack Developer seeking to leverage strong programming skills and passion for creating dynamic web application. Dedicated to mastering both front end and back-end technologies to contribute to innovative and impactful projects.

TECHNICAL SKILLS

- **Languages:** Java, Hibernate, Servlet, JSP, HTML5, CSS3, JavaScript, ReactJs, Spring Boot
- **Applications:** MS Office, GitHub
- **Servers:** Apache, Tomcat
- **Database:** Mysql, SQL

Technical Projects :)

- **Employee Management System:**
I have developed an Employee Management System project using Core Java and JDBC. This system likely allows you to efficiently store, retrieve, and manage employee information within a database, offering features such as adding new employees, updating their details, and generating reports or queries related to employee data.
- **Book Store:**
I have successfully created a Book Store project using Servlets, JSP (JavaServer Pages), and Hibernate. This project likely allows users to browse, search, and purchase books online, with Hibernate handling the database interactions for efficient data management.
- **E-commerce website:**
The e-commerce website project is a modern and robust online shopping platform that leverages cutting-edge technologies to deliver a seamless shopping experience. Built using a powerful tech stack that includes Spring Boot, ReactJS, Hibernate, and MySQL, this project combines the best of backend and frontend technologies.
